

August 18, 2020

Dear Parents/Guardians,

Greetings! Please allow me to introduce myself. My name is Ralph Seurattan and I will be teaching your child the following two course electives:

Semester 1 - Exploring Technology and Career Planning.

Semester 2 - Exploring Aerospace Technology.

Exploring Technology course give your child an opportunity to explore technology and its associated careers. In addition, the exploring technology course will expand your child's understanding of the role technology plays in our contemporary society and the role it will play in our future. Students will be given the opportunity to solve technological problems using a variety of tools, materials, processes and systems while gaining an understanding of the effects of technology on their everyday lives.

The purpose of the Career Planning section of the course is to assist your child in making informed decisions regarding his/her future academic and occupational goals and to provide them with information regarding careers in the engineering and technology fields.

Exploring Aerospace Technology course give your child an opportunity to explore the area of aerospace technology and its associated careers. Students will be given the opportunity to solve technological problems using a variety of tools, materials, processes and systems while gaining an understanding of the effects of aerospace technology on their everyday lives.

I look forward to working with you and your child this school year. If you have any questions, please contact me by email. Thank you and have a great day.

Sincerely,
Mr. Ralph Seurattan
Technology and Aerospace Teacher
